TechNet NAMED INTEGRATION PARTNER FOR ShotSpotter
*Gunshot Location System Offers Cutting-Edge Technology for
Public Safety and Homeland Security Solutions*

Victor, New York - TechNet Global Services, an industry leading high-tech solutions integrator, today announced that the company is now an Integration Partner for ShotSpotter Gunshot Location System (GLS). ShotSpotter's patented technology detects and pinpoints the location of gunfire and explosive discharges within seconds. Capable of protecting diverse environments from urban neighborhoods to the military combat field, the system is used by dispatchers, investigators, and crime analysts to rapidly respond to emergencies, conduct targeted enforcement, and gather forensics for prosecution.

"With a strong focus on public safety and homeland security, TechNet is proud to partner with ShotSpotter to bring their patented, highly secure Gunshot Location technology to our customers," said Jerry Fischette, CEO of TechNet Global Services. "Our highly qualified team of engineers can easily deploy ShotSpotter technology for projects that vary in scope and size while also offering our customers the opportunity for future growth and increased protection with this system."

The ShotSpotter GLS has been deployed in 32 cities and counties across the U.S covering over 100 sq. miles. The system utilizes the principles of acoustic triangulation to accurately locate gunfire across wide, complex protection areas and provide comprehensive situational awareness to commanders and emergency responders.

TechNet is proud to partner with ShotSpotter to offer the most reliable and cost-effective acoustic surveillance tool for law enforcement, homeland security, and military.

About TechNet Global Services

Founded in 1993 by CEO Jerry Fischette, TechNet Global Services is nationally recognized as an industry leading high-tech solutions integrator. With an unparalleled standard of excellence, TechNet Global Services has a history of quality and expertise in the delivery and implementation of technology. From design, to installation, to service and maintenance, TechNet Global Services offers complete technology solutions, including satellite, wireless, telecom, security/surveillance, access control and A/V to an increasingly diverse clientele. With a long list of experienced partners, access to the most innovative, cutting-edge technology and a highly qualified team of professionals, TechNet Global Services continues to lead the industry in technology solutions, full service integration and implementation while maintaining a strong commitment to customer service.
